Professional Summary

Computer Science graduate with experience driving end-to-end MVP delivery, technical product discovery, and cross-functional execution across cloud and web applications. Bilingual (English and Spanish).

Education & Certifications

B.A. in Computer Science | Wabash College, Crawfordsville IN

May 2026

- **Relevant Coursework:** Database Programming, Algorithm Design, Data Science, Data Structures.
- **Certifications:** AWS Certified Cloud Practitioner; Google Data Analytics Foundations.

Core Product & Leadership Competencies

- **Product Strategy & Management:** Product Lifecycle Management, Roadmap Execution, Requirements Gathering, Stakeholder Alignment, Feature Prioritization.
 - **Agile & Team Leadership:** Agile, Cross-Functional Team Leadership and Coordination.
 - **Data & Technical Literacy:** Figma, SQL, Data Analytics (Excel, Python), AWS, Git.
-

Professional Product Experience

Founder & Product Lead | MatchCut

Feb. 2026 – Present

- **Product Strategy & UI/UX:** Conducted user discovery to map marketplace pain points, creating end-to-end interactive prototypes and design systems in Figma.
- **Algorithm & Feature Delivery:** Architected the MVP roadmap and a weighted matching algorithm connecting client hair profiles with barber specialties across sprint cycles.

Product & Operations Lead | Ramos Lawn Care & Services

Feb. 2026 – Present

- **Systems Architecture & Finance:** Built an automated tracking system managing \$10.7K+ monthly revenue and securing a 21.7% net operating cash reserve across 19 accounts.
- **Workflow Optimization:** Digitized scheduling and automated billing reconciliation, eliminating paper invoicing and preventing unbilled visits.

Product & Technical Intern | Montgomery County Free Clinic

Sept. 2025 – Dec.2025

- **Product Strategy & Execution:** Led a 3-person development team through the full product lifecycle to digitize clinical operations, mapping complex administrative needs into technical specifications and feature roadmaps.
 - **Delivery & Quality Control:** Defined data validation constraints and success metrics, driving on-time delivery of a cloud platform that accelerated administrative processing.
-

Technical Projects

Digital Intake Platform | React, TypeScript, Supabase, Figma

- Owned product discovery to deliver an MVP web application for clinic staff, reducing onboarding friction and entry errors.

Client Digital Platforms & Web Strategy | Figma, HTML, CSS, React, Git

- Partnered with business stakeholders to define site requirements and design user flows in Figma, managing end-to-end product delivery and cloud deployment to drive client engagement.
